Your parts. Your PO. All in one portal.

Streamline equipment parts purchasing when you connect to Service Shop

Ordering the parts you need to make repairs can be labor-intensive and time-consuming. Plus, out-of-service equipment hinders your facility's ability to efficiently schedule staff and provide quality patient care.

Connecting to Service Shop lets you integrate the GE HealthCare parts catalog with your own purchasing system, giving you instant access to thousands of parts, real-time pricing, and up-to-date inventory information. With just a click of a button from your CMMS, ERP, or procurement system, you can easily source, price, and order the parts you need—as soon as you need them.

Connect to Service Shop

- Choose from 85,000 frequently ordered GE HealthCare parts
- Create and submit purchase orders within your system
- Review pricing while generating a PO
- Update existing orders
- Improve accuracy by eliminating manual data-entry errors
- Receive shipping notifications
- Help enhance workflow and reduce ordering time

→ **Email parts.now@ge.com to integrate your system today.***
